

Moviemaking with your Smartphone

Ben Williams from the Winnipeg Film Group shows you how to use a smartphone to capture video and then edit it into a short movie using free online software. This interactive workshop will show ways to enhance your movie by applying a variety of filmmaking techniques and adapting accessories such as tripods, microphones, lights, and lenses. Participants are required to bring their own smartphone (camera-ready iPhone, Android or Windows smartphones only).

Millennium Library

Computer Training Lab (4th floor)

Saturday, July 19, 1-4 p.m. **OR**

Saturday, August 16, 1-4 p.m.

Call 204-986-6450 to register.

WINNIPEG  GROUP

Winnipeg Public
LIBRARY

This is a Makerspace program.

Makerspace programs provide opportunities to create, experiment and collaborate in a self-directed, hands-on learning environment. Thanks to Beastgrip for donating the use of their rig system for this program.
